	Viewer Run					
	View each Document after creation					

► Use the Destination tab to specify the location and filename

► Use the Images Save Type Setup tab to specify the Save Type – ie jpeg

Extract Images from PDF									
			Save Setup						
Destination Setup	You may specify the Save Type for all Extracted Images Single-page Image(s) type:			Multi-page Image(s) type: Image (s) typ					
	Image Type	Gray (8bpp)		Dither	Yes				
	JPEG Quality	75		Horizontal DPI Vertical DPI	96				
				Compression	ISO JBIG				
				Encoding Type	General				
				File Organization	Sequential				

► Click Process

If you are using a document that has a large number of images and if you are saving each image to a separate file you may see the following warning

Now, perhaps extract a page with the required image(s) on it and going through the process bit by bit rather than doing it all at once might be a better option!
